---

# The Current States of the Forex & Crypto Market

The current market capitalization of the currency market has already reached trillions of dollars – and is still growing exponentially – we have still only scratched the surface of what Forex and crypto currencies are able to achieve. The majority of crypto wallet holders purchase multiple crypto currencies and forex but don't actually earn anything on their holdings.

Instead of maximizing the utility and earning potential of their currency investments, they merely hold them in the accounts of centralized crypto exchanges like Binance, Bybit, and Coinbase etc. as well as in trading platform Meta trade, Octa, Fxpro and iforex etc. as well as wallets like Trust wallet, Metamask, Pro and Token Pocket etc.

The global trading market size : + 5.10 Trillion (USD) per day.

Lexin Trade provide a way to earn handsome profits. Such type of funds invest in lexin trading platform.

# Currently Faced By the Crypto Space

## Un used, Huge, Idle Crypto Funds

Many \$trillions in crypto sites in centralized exchange accounts or wallets –with the hold of these assets projected to grow more than a staggering over \$ *trillions* by 2025.

Yet, while investors watch the value of their portfolios increasing or decreasing every day, they fail to earn profits on their crypto . Consequentially, they squander the huge opportunity to earn profits of putting in trading their highly-valuable assets.

## Lack of Trust

Centralized exchanges have consistently shown that they can't be trusted with the custody of their users' cryptocurrencies. As a result, staking crypto on these platforms goes hand-in-hand with the risk of their account being hacked –and the loss of their entire portfolio. As it stands, crypto exchanges get full control over their users' funds and they're left with no option other than to trust them.

## Lack of Access

To stake their crypto with the current generation of centralized exchanges or platforms, users have to submit to a lock-up period. This period can range from days to months, or in some cases even years. While their funds are frozen in this way, users can't take profit from market trends, invest in other emerging opportunities, or even simply liquidate their position.

## Lack of Technical Knowledge

Staking crypto on decentralized platforms may be the wiser and more profitable in the long term, but many crypto holders lack the technical ability to do so. Consequently, many users settle for centralized staking platforms, because it's the easier choice, and decentralized staking continues to struggle to gain popularity.

# Why Lexin Trade?

---

## Stable Passive Income

Lexin Trading platform where Grow your crypto. earning with daily passive staking profit & rewards from participate in Forex & cryptocurrencies.

## Safe

Lexin Trade is truly decentralized, giving you a secure platform to grow your cryptocurrency portfolio.

---

We've integrated a Node cluster within the Lexin Trade wallet to make Trading Profits on your crypto easier than ever.

**This is the first process all users will need to sign up with referral link on Meta mask, Token Pocket, Trust wallet etc. and get Unique ID no. (link) And Password to Wallet account.**

**All registered users will able to Active ID. they can use their wallet to deposit USDT, LEX ( BEP-20 ) .**

**Once users successfully complete the process will be able to take profit share and doing business with Lexin.**

Simply add on USDT or LXT (BEP-20) crypto in the Lexin Trade Wallet and activate Trading key, our AI-powered algorithm automatically delegates it to the Validator offering the best Trading rewards. In the event that crypto is delegated to a Validator which goes down - or if another Validator offers higher returns, the crypto will be automatically delegated to lucrative Validator.

# The Lexin Wallet Support

---

The Lexin Trade wallet enables you to earn profits on your trading investments.

## Store Currencies

Lexin's Trading wallet easily connect with other wallet. Intuitive and easy-to-use wallet like Metamask, Token Pocket, Trust Wallet etc. that are designed to store multiple crypto currencies, including Bitcoin, Ethereum, BNB, Tron and many more. Better still, our development team is committed to extending the Lexin Wallet's functionality by consistently adding compatibility with new blockchain networks. Lexin's goal is to be the industry leader for crypto wallets – the users think of when entering the world of blockchains and cryptocurrencies.

EARNKARO

## Earn Profits

The Lexin's Trading platform connect with decentralise smart contract. the most advanced wallet & with which you can earn crypto. Lexin has integrated multiple valuator, or block chain verifiers, within the wallet itself, so you earn profits on your funds.

you simply delegate your crypto USDT or LXT to lexin Valuator, that, in return, profit share with you.

Lexin platform provide you a unique ID no. and password on smart contract. so that you can look out your teams, business, Profits, Incentive and rewards etc. and are you free to delegate or withdraw them –instantly.

## SOME KEY FEATURES OF LEXIN WALLET:

---

### UNLIMITED MULTI-CURRENCY AND CRYPTOCURRENCY EXCHANGE:

Minimizing Currency Conversion.

Optimizing Purchases.

Activation of Reward Incentives.

Enabling Group Purchase Discounts Facilitated By Minimum /Order Threshold Ratings.

Lexin wallet is a secure, fast and user-friendly app. This app benefits users in a variety of ways.

We have implemented the best practices that offer high-quality, intuitive solutions.

---

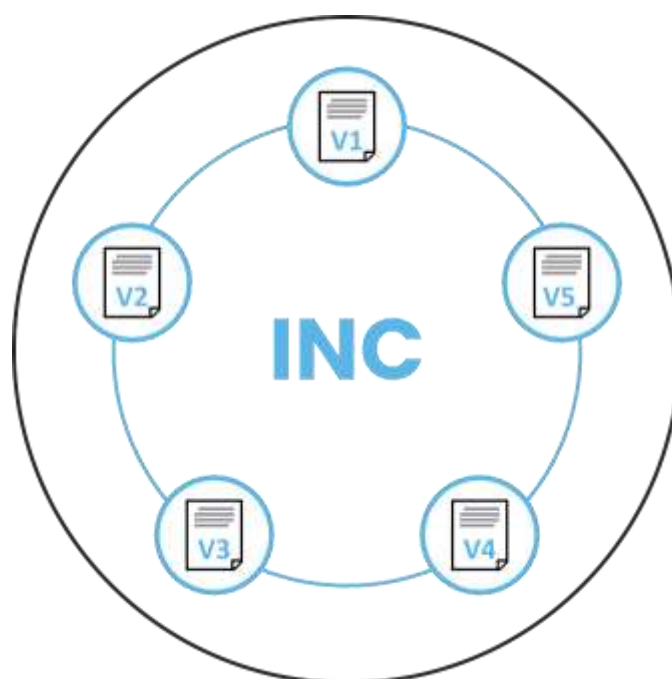

# Lexin Trade Integrated Node Cluster (INC)

---

Decentralized, peer-to-peer blockchain networks are composed of computers known as Nodes. With no central authority in charge of the blockchain, it's the Nodes that are responsible for storing the data held within the blockchain, i.e., a history of every transaction that occurs on the blockchain and the account balance of each wallet holder. It's also each Node's responsibility to update its version of the blockchain whenever new data is added, i.e., when new transactions are made - but this data needs to be validated first.

Again, with no central authority, the blockchain network relies on a large subsection of special Nodes to verify transactions. On Proof of Stake (POS) blockchain networks, such as Polkadot, Solana, Avalanche, and Cardano, these Nodes are known as Validators. When a Validator verifies a group of transactions within a block and adds it to the end of the blockchain, they are rewarded with new crypto, in a process known as minting.

However, to ensure that Validators act ethically and don't authorise fraudulent transactions, they are required to lock up a certain amount of cryptocurrency with the blockchain network. This process is called Staking and entitles a Validator with the chance to validate new transactions and earn newly created crypto through the minting process. If a Validator does go on to authorise an invalid transaction, they run the risk of forfeiting some or all of the crypto they staked, which is known as slashing.

Lexin's Trade revolutionary Integrated Node Cluster (INC) technology takes this network of Validators and integrates them into a single crypto wallet. As a result, Lexin is not forced to depend on a single Validator. Lexin runs its own Validator Node as well to earn block rewards while lowering the risk of slashing. This technology delegates the crypto only to the Validators providing the highest rewards. Lexin's innovative INC solution means its members can earn generous interest by staking the crypto in their wallets without handing over control of their funds.

# What Makes Lexin Trade's INC Special?

## Truly Decentralized

Lexin Trade firmly believes in open source of business model. Lexin truly decentralises contract where everyone makes account through referral link and according to self choice participate in Lexin trading program to invest Crypto – and so never Lexin takes custody of your account. So, you can give & take your crypto with greater confidence, flexibility, and peace of mind.

## No Lock up

Lexin's Trade INC provides clients with the flexibility to delegate or withdraw their profits and incentive anytime. You get to earn profits for the time your Lexin account will live.

## Super Simple

Members don't need any technical knowledge, simply active Lexin trading account by USDT or LXT crypto in the wallet earns them passive staking rewards.

## Increased clients profits

Lexin's Trade INC technology generates profits on client's crypto is only delegated to Valuator's providing the best rewards, resulting in a higher return on investment on your crypto holdings.

# Smart Liquidity Solution (SLS)

---

Each POS blockchain network has different rules regarding lock-up periods. During this period, a user's tokens are locked up in a smart contract on the blockchain, preventing them access to their staked assets. This creates a new scenario called lock-up risk, which refers to the opportunity cost of users not being able to reallocate or liquidate their assets in line with changes in the crypto market. The ability for the user to stake their crypto assets without a lockup period would be a way to mitigate lock-up risk. This is where Streakk's Smart Liquidity Solution (SLS) comes into play.

Lexin Trade's SLS solves the liquidity issue routinely faced by block chain networks in this ways:

**Lexin Trading Liquidity Pool** –Lexin pays out Trading profits to its clients 5 days in week. Each client active Trading Key of their Trading account. They receives their trading profits & rewards.

To be eligible for withdrawal minimum \$10 and multiple \$10.

Lexin Client who withdraw their principle funds in this case deactivate trading account and all benefits will be laps.

# Lexin Trade Risk Mitigation Policy

---

Lexin Trade has developed layers of risk mitigation to both protect our Clients from loss of funds and maximise their profitability.

## Trusted and Secure Validator Nodes

POS block chain networks.

Lexin Trade does not only depend on external validators and, instead, runs its own Validator Node as well to earn Profits for clients. By providing regional and data – center diversity and Node redundancy, Lexin Trade is committed to maintaining best-in-class uptime.

## Enhanced Monitoring

Lexin Trade expert team and AI-assisted monitoring protocols, around the clock, to avoid downtime-related slashing. If a Validator goes down, Lexin's INC auto delegates the crypto & forex to other Validator.

With our management team & clients distributed around the world, Lexin Trade implements, protocol- specific failover strategies to eliminate the risk of double-signing, as well as hot- spare and fully-synced backup Nodes for fast recovery.

## Failure Safeguard

Lexin Trade has manual failover safeguards in place, thanks to our highly experienced and knowledgeable team, to further eliminate the risk of double-signing. With Lexin Trade automatically handling all of this for you, there's no need to worry about staying online, in sync, and up-to-date, you can manage other aspects of your investments instead.

## Slashing Safeguard

If slashing occurs due to node malfunctions, your crypto investments is instantly auto-delegated to another active Validator.

# Lexin Trade Tech...

---

## Full Transparency

Lexin Trade has strong commitment to transparency and decentralization, so all our operations and transactions are fully transparent to anyone through blockchain explorers.

## Automatic Payouts

All profits, incentive payouts are calculated and processed automatically, so Lexin system your rewards are sent out automatically instantly on your request every week.

## High-Performance Server Architecture

Lexin Trade high-performance servers, broadband channels, and advanced network topology allow for a staggering 99.99% uptime and rapid block generation.

## Enterprise Level Hardware

Lexin Trade employs enterprise-level hardware solutions to operate Nodes on the most popular, and profitable, blockchain networks.

## Highly Technical, Skilled & Expert Team

The team behind Lexin Trade is loaded with decades of experience and specialized technical skills. This not only ensures smooth day-to-day functionality but the ability to consistently add functionality to our wallet and allow our members to maximize returns on their crypto investments.

# Lexin Trade Competitive Landscape

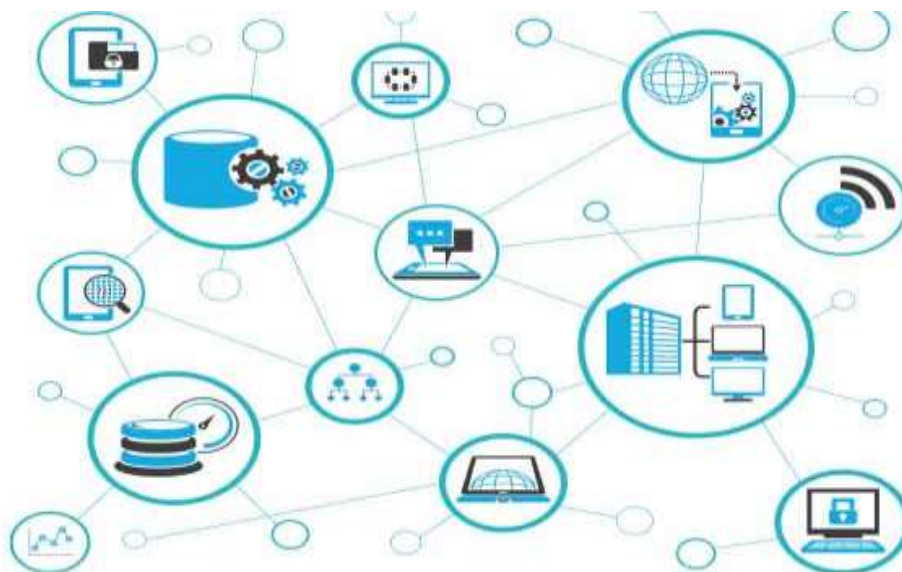

Lexin Trade INC technology puts the world's most advanced node infrastructure in the hands of its clients. As a result, it offers them the perfect solution for maximizing the return on their crypto currency investments – all while retaining 100% control of them.

<b>Process</b>	<b>Automatic</b>
<b>Profitability</b>	<b>Maximized</b>
<b>Delegation of Funds</b>	<b>Cluster of Validators</b>
<b>Auto Delegation</b>	<input checked="" type="checkbox"/> <b>Yes</b>
<b>Control over funds</b>	<input checked="" type="checkbox"/> <b>Yes</b>

# Lexin Trade : Blockchain Network

Lexin Trade works on a proprietary consensus algorithm which utilises a combination of Proof of Stake (POS) and Simple Time Protocol (STP). As detailed above, POS requires Validators to stake a certain amount in the form of USDT or LXT (BEP-20) of a particular network's cryptocurrency to receive the right to validate transactions on the network. In return, they earn profits & rewards, in the form of USDT or LXT (BEP-20) cryptocurrency, for their efforts.

**POS +STP =Extremely Fast Block chain Transactions**

**Data exists at a particular time**

STP works on a verifiable clock. It incorporates a clock into the blockchain which verifies time taken between two events. It reduces the load on the validators connected to the network. As a result validators in the network know the timestamp of the events and they need not check with all available validators back and forth to record a transaction. It enables fast sequencing of blocks.

---

# Fastest Blockchain For Finance

Lexin Trade will be build a 3rd generation blockchain network with a low and predictable fee of only \$0.00010 per transaction. With this will be also full fill all facility, fast and square feature. for big corporations and banks looking to implement blockchain on a large scale, Lexin trade will offers a super fast and secure solution. This not makes lexin the fastest blockchain, but the best Blockchain focused on financial transactions.

# Use Cases

---

## • Stable Token

LXT Token Deploy a stable token on all Lexin Trade programs to make it more useable, viable for smaller blockchain transactions.

## • Crypto Utility

Lexin Trade create utility option for LXT to helps maximize the potential of crypto currencies by giving them greater day-to-day utility.

## • Trading Profits

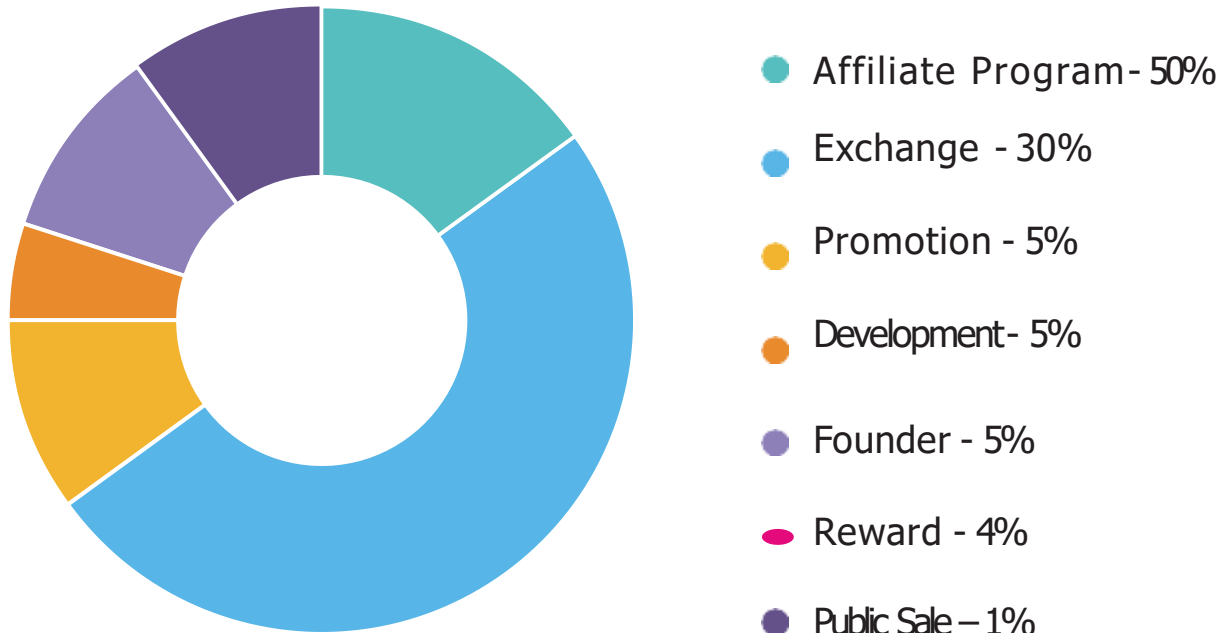

Lexin Trade builds options within the crypto ecosystem and allows clients to earn on their crypto after add in trading key with lexin platform.

# Lexin Give Wings to your Earning

---

## Lexin Trade Token distribution

is totally according to future and long vision planning. Lexin management will be put best offers to create utility, best price and best place in crypto market of Lexin Trade Token (LXT) in coming time.

Important is this only 50000 LXT (1%)Tokens released for private sale that started from June 2023.

Tokens stored in the foundation treasury fund is supposed to be served as a "last-resort" in the case that the network requires funds to solve a particular problem that another source of funding.

- Private sale of 1% (50000 LXT Tokens) - June 2023
  - Launch price of 1 LXT = \$1
-

# What are digital assets ?

---

Digital assets are commodities that are stored digitally and identified by organisations to assign value. Examples of digital assets include currencies, documents, audio, videos, logos and websites.

Similarly, Crypto currencies are digital assets that are secured by cryptography in a database called Block chain, which makes it nearly impossible to counterfeit or double-spend.

## What is cryptocurrency?

---

Crypto currency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone any where to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets.

Cryptocurrency received its name because it uses encryption to verify transactions. This means advanced coding is involved in storing and transmitting cryptocurrency data between wallets and to public ledgers. The aim of encryption is to provide security and safety.

The first cryptocurrency was Bitcoin, which was founded in 2009 and remains the best known today. Much of the interest in crypto currencies is to trade for profit, with speculators at times driving prices skyward.

In 2008, a group of people (currently known under the pseudonym Satoshi Nakamoto) created the guiding principles of the first and leading cryptocurrency in the market today, Bitcoin. In 2009, Bitcoin was launched to the world. But it would be years before it was formally recognized as a means of payment among leading merchants, starting with Word Press in 2012.

The underlying blockchain technology is today used in banking, insurance, and other business sectors. Growing at a compounded annual growth rate of 12.8% since 2021, the cryptocurrency market is estimated to reach \$4.94 billion by 2030, thanks to the need to improve the efficiency of today's payment systems, rise in global remittances and increased need to secure data.

### **Transacting or investing**

Crypto currencies like Bit coins can be easily transferred from one digital wallet to another, using only a smart phone. Once you own them, your choices are to:

- a) use them to buy goods or services
- b) trade in them
- c) exchange them for cash

If you are using Bitcoin for purchases, the easiest way to do that is through debit-card-type transactions. You can also use these debit cards to withdraw cash, just like at an ATM. Converting crypto currency to cash is also possible using banking accounts or peer-to-peer transactions.

---

## Is LXT Future Assets ?

---

With further capitalization of the BINANCE Smart-chain, the need for smart contracts and smart tokens has risen for multiple service sectors. The LXT launched to align itself with the growing market of users of the digital coins and tokens. LXT will target the Meta gaming, Meta verse, NFT, UI and utility portal & finance industry etc to make smart contracts and smart agreements running on multiple Smart chain ecosystems.

Because Crypto currency is a digital assets and LXT also a crypto currency. if we look out assets then we know from last time everyone collect assets for future. As a example, if we think of assets like Real-estate, House,

Gold, Bonds, Deposit funds , Audio, Video Books, Art, Music, Intellectual property, loyalty points, carbon credits, coupons etc. Most of these are already digitalized but with a centralized mechanism and without smart chain. Imagine if all of the above functioned as digital assets but in decentralized smart chain platform. Similarly, when we look into the future of smart devices, global data states:

“The number of smart devices & digital currencies demand will be exceed in very near future. The creation of a digital currency network is inevitable.”

We depend upon these devices & digital currency in coming time. Such is the power of the Smart device and smart currencies capitalizing on these smart devices.

---

# LXT Token Utility :

---

LXT is a financial revolution. This is BNB Smart Chain Blockchain-based cryptocurrency.

The LXT TOKEN base of this decentralized digital currency is BEP-20. The functionality similar to the functionality of BNB is the specialty of this Block chain-based asset.

LXT Token a multi-utility token will be used for hassle-free exchange of money from one part of the world to another. Users will not have to worry about any arbitrary limits or central repositories throughout the process. LXT will be used in almost every industry. This is something that makes this crypto currency multi-utility. The list of industries it can be used and time to time will be add on more..

In simple words, this multi-utility token will add value to the financial transaction related experience of users. It will be easy source of people transact. users will be able to use LXT for buying anything :

- 01  Finance
- 02  Forex trading
- 03  E-commerce
- 04  NFT
- 05  Crypto trading
- 06  Exchanges
- 07  Fantasy Gaming
- 08  Chat Applications

Strategically developed financial and commercial partnerships make it a multi-utility token that offers more value to holders.

---

---

Lexin Trade is a trading platform of forex and crypto currency and successfully received funding from many investors from all parts of the world.

# Project Roadmap

# Project Roadmap

---

# What's is exchange ? LXT Token will be Listed on Exchanges :

---

Exchanges play vital roll in Trading. An exchange refers to a market where users can buy and sell financial assets. There are countless exchanges worldwide that specialize in different products and services. Notably, the New York Stock Exchange (NYSE) focuses on selling shares in American companies. In contrast, the Foreign Exchange Market (FOREX) offers trading between fiat currencies.

Crypto currencies also have dedicated exchanges that offer digital assets like Bit coin, Ethereum, BNB etc. However, unlike traditional exchanges, crypto exchanges come in two varieties: centralized and decentralized. Currently, all major exchanges in traditional finance are centralized, meaning a third party always controls the order books.

LXT Token will listed on some reputed exchanges in coming time. This will be add on the profits & strength of investors and traders.

Our already existing global community of and active users will play the most important role in this. These users will do their best to rate and vote very high to help LXT Token get listed on exchanges.

All LXT TOKEN and wallet users will get the easiest and fastest access to the world of digital decentralized assets and crypto currencies for hassle-free exchange and trading of crypto currencies.

Investment sector is a big part of human life. Normally, we invest money in property, Bank, Share, mutual funds etc. and our income source are Business and Job. But One more big sector for investment and earning is Forex & Crypto Trading. where involve all Big company, world wide People & banks. Forex and Crypto trading have gained very much popularity & profits in during recent years .

Trading is Online buy/sell business....Commodities, Gold, Silver, Forex, Crypto etc. world wide Forex trading market to grow day by day. the global trading market size reach + 5 trillion (US dollar) per day.

But however people failure ratio is very high 90% to 95% people are Failure in trading. Reason of failure lack of knowledge, lack of Set up and lack of expert team.

Lexin Trade platform doing trading for us with expert team. we can participate in Lexin Trade affiliate program and get profit share & incentive on daily base. Lexin Trade expert team motive providing forex education and supporting to good passive earning to all subscriber.

Lexin Trade is a superior global management and good trading featuring, rich front, powerful back office and accounting system, delivering a world class profit solution to his respective clients all over the world.

The Lexin Trade is a true three dimensional platform. multi-asset class, multi-market and multi-currency, that supports forex, Futures, Equity, CFD's, Derivatives, Bonds, Options, Funds and ETF', with connectivity of markets worldwide.

Lexin Trade expert team every time focus on trading market. Main motive to generate Revenue from trading. that will be share time to time with clients.

---

---

Ecommerce, also known as electronic commerce or internet commerce, refers to the buying and selling of goods or services using the internet, and the transfer of money and data to execute these transactions. Ecommerce is often used to refer to the sale of physical products online, but it can also describe any kind of commercial transaction that is facilitated through the internet.

Whereas e-business refers to all aspects of operating an online business, ecommerce refers specifically to the transaction of goods and services.

Since then, ecommerce has evolved to make products easier to discover and purchase through online retailers and marketplaces. Independent freelancers, small businesses, and large corporations have all benefited from ecommerce, which enables them to sell their goods and services at a scale that was not possible with traditional offline retail.

**The global retail e-commerce market is expected to experience significant growth in the coming years. It is projected that total ecommerce sales will surpass \$5.5 trillion in 2023, and will continue to grow to exceed \$8 trillion by 2026.**

**Lexin Trade Group shortly enter in E-commerce business. large number of daily need products will be available for shopping. Time to time more products will be add on according on market demand.**

**this will be Positive points for all LXT clients. The E-commerce platform will be a big source of Revenue generate.**

**In coming time profit share &, Incentive will be use on this platform. And also LXT token will be readme**

---

## What Is Fantasy Gaming ? Lexin Gaming Platform :

---

Games, If you are not into gaming, you must know a little about fantasy gaming. A fantasy game is one that is played over the internet where players make their virtual teams selecting real-life players. The win or loss in the fantasy game depends upon the real performance of the player you have chosen in your team. So, if AB de Villiers is on your side and hits a century, you earn points. Then you can get the rewards directly in your bank account or wallet. But remember, they require you to pay a nominal initial fee.

### How Popular is Fantasy Gaming In China & India?

With Dream11 hosting the IPL 2021, you can understand the reach of fantasy gaming companies. With the increasing use of smart phones, most people are taking part in online games. Also, there are cash rewards that attract people. The revenue was somewhere near 200 crores in 2014, which doubled in four years and rose to 438 crores in 2018. In 2019, it showed tremendous growth and reached 920 crores which took only one year to triple up, and in 2020, the figures touched a mighty 2470 crore. These figures are self-explanatory of how Dream11, Pubg, MPL, Zapak, CricPlay, Rummy, Roblox etc., are ruling the markets. Besides, cricket has always been a favorite among Indians & Chinese. They have also shown this love in fantasy gaming. According to a survey by Indiacasino.info.com, in India & China almost 71% of players love cricket. Football follows suit with 54%. With the Pro Kabaddi League, are also drawn towards this indigenous sport, and Kabaddi holds third place with 6% of total players in its pocket. And it should be understood that of all the players, 89% of players are mobile users. And you should also know that, of all the game genres, only 31% play sports-related games on their mobiles. With the increasing popularity and a phone in every user's hand of the population over 265 crores of both countries, the market is huge, and growth potential is high.

## What are NFTs? Lexin NFTs Platform :

---

NFTs (Non-fungible tokens) are unique digital assets deployed on a blockchain and can be traded anytime by their owners. NFTs can represent any digital file form such as digital arts, video game avatars, and other wearable's, videos, digital signatures, soundtracks, virtual real estate, etc.

Unlike fungible tokens such as crypto currencies which owners can mutually

exchange, each NFT has a particular value depending on its features. Consequently, you cannot replace one

NFT with another.

Currently, the most expensive NFT ever sold is The Merge which sold for \$91.8 million.

Meanwhile, other NFTs, such as Crypto Punk and the Bored Ape collection, is also widely known for their high value.

**Lexin Trade will be provide educations, knowledge and idea about NFTs, Lexin Trade technical experts doing work on technology. In coming time NFTs platform will be part of Lexin business. with this, we will provide options to our worldwide data base to make, design and buy/sell NFTs. also such platforms where you can buy and sell non-fungible tokens.**

Digital Asset - NFT is a digital asset that represents Internet collectibles like art, music, and games with an authentic certificate created by block chain technology that underlies Crypto currency.

Unique - It cannot be forged or otherwise manipulated.

Exchange - NFT exchanges take place with crypto currencies such as Bit coin on specialist sites.

### What is an NFT marketplace?

In 2020, the NFT (Non-fungible token) market saw a total trade of about \$82 million. Subsequently, in 2021 this figure increased to a whopping \$17.6 billion, sign align a market boom for NFTs.

This market trend was even more evident when 475 Etheria tiles that were not sold for almost 6 years got sold within a day for a staggering \$1.4 million. These tiles were the first set of NFT projects on the Ethereum block chain.

So, you might wonder, what are NFTs, and where can you trade them? This article will help you learn about NFTs and NFT marketplaces.

## What is Meta verse? Lexin Trade business with meta verse :

---

A meta verse is a shared, online 3D space where users can interact with each other and with computer-generated objects and avatars. It is a virtual world that uses the Internet as its underlying network. Meta verses are used for various purposes, including social networking, online gaming, education, and training.

They can be used to create virtual worlds that mirror the real world, or they can be used to create entirely new and imaginary worlds.

They offer a unique and immersive experience unlike anything else on the Internet. They are constantly evolving and expanding and offer endless possibilities for exploration and interaction. With the recent announcement of Facebook rebranding as Meta, you may hear about the Meta verse more often than ever before. But is this really a new concept? Or has it been around for a while? Let's find out.

How to buy land in the meta verse?

The virtual estate is already a big business. Global businesses and superstars such as JP Morgan, Snoop Dog, PwC, and Samsung already have virtual lands intended to be developed for a variety of reasons. Less than a year ago, the average price for a plot of virtual land on Decentralized or Sandbox (meta verse platforms) – was around \$1000, whereas today, that same plot costs around

\$13,000. But how exactly can we buy land in the meta verse?

The first step is to get hold of crypto currencies such as Ethereum or SAND (a game version of the meta verse, the Sandbox) and MANA (connected the Decentralized platform). When it comes to owning virtual land, these two platforms are currently the popularly known ones. They have well-known established companies and celebrities being part of their virtual worlds.

Purchase land, it can be done directly on the platform, and any sales are recorded via transfer of NFTs. You will require a wallet that is capable of storing this, such as Meta mask or Binance. Apart from these platforms, you can buy virtual land on the meta verse from third-party resellers such as opensea.io or nonfungible.com. The future directly depends on the meta verse itself. Big corporations such as Facebook (now, meta) claim that the meta verse is the "next big thing." However, it is too soon to tell what the future would look like.

Lexin Trade Experts team looking very advance technology in meta verse. that will be create many option to business and earning. According to time Lexin Trade will be find out business and revenue generate option in meta verse technology.

## What is solar energy? Lexin Trade solar energy projects :

---

Solar energy projects are reaching every sector. All the world is thinking about solar energy. The sun is an incredible and renewable resource that has the power to fuel life on earth and provide clean, sustainable energy to all of its inhabitants. In fact, more energy from the sun reaches our planet in one hour than is used by the entire population of the world in one year. The sun's energy can be converted into electricity through solar photovoltaic (PV) modules (photo = light, voltaic = electricity). Lexin Trade in coming time introduces huge projects in solar energy. Also mini solar plants production and installation will be through our business partners.

## How does solar energy work and why should we use solar energy?

PV modules absorb sunlight and convert the energy into a usable form of electrical current. The sun shines all over the world, making solar electricity viable anywhere. Because solar can be paired with batteries for energy storage, solar electric systems can be independent of the utility grid, making them cost-effective for remote locations. Solar modules have no moving parts making maintenance costs low, and they are highly reliable with a long service life of 25+ years of guaranteed electricity. Solar electricity relies on the sun as its fuel source, so there is no need to drill for petroleum-based fuels, refine them, or deliver them to the site. As you can see, there are a lot of advantages of solar energy.

**Lexin Trade will be launch high definition solar products world wide with celebrations of solar production house. it will be one of best project to revenue generate.**

## Why Solar energy?

Savings from solar panels add up. According to Energy Sage, homeowners in Washington will save \$17,173 to \$23,234, if they go solar over a 20-year period, based on 2019 costs for a 5 kW system. In California, homeowners will save \$44,728 to \$60,515, and, in New York, homeowners can save \$17,504 to \$23,683 over 20 years, based on 2019 costs for a 5 kW system. Some estimates put these savings at much higher numbers.
